Re: Application: FY17/18 RTP Grant Pre-Application Proposal

Dear Ms. Davis:

The City of Orange Beach respectfully requests your consideration of this pre-application to the Recreational Trails Program for the Backcountry Trail Interpretive Loop Project that will connect the Hugh S. Branyon Backcountry Trail to the Orange Beach Sportsplex via a .65-mile loop around a city-owned lake and natural area contiguous to the Trail and Sportsplex. This project will be managed as an ADA-compliant, multi-use path system and will incorporate natural interpretive signage and projects along its length. As a designated National Recreation Trail, we are committed to maintaining a project worthy of national recognition. We greatly appreciate the support we have received under this program in the past and thank you for the opportunity to participate in this worthwhile program once again.

As we all know, contributing factors to the rising cost of health care includes lack of exercise. Studies have shown that health problems, such as childhood obesity, heart disease, etc. can be prevented by walking, hiking, or biking a few times a week. The Backcountry Trail provides residents and visitors a place to exercise and enjoy the unique natural environment of the Alabama Gulf Coast. This proposal will allow the city to expand the Trail system and continue to maintain the highest quality of standards for a biking and pedestrian trail.

We are committed to sustaining and improving the quality of life of our residents and guests, and feel this project progresses toward this goal. The total cost for this project is \$157,825.13. We are requesting \$116,532 in RTP funds and are committed to providing an additional 20% cash match plus a \$12,160 in-kind match to complete the project. In November of 2016, the Orange Beach Municipal council approved a cash match for a Recreational Trail Grant for project cost up to \$200,000. I hope you find our pre-application worthy of a chance to submit the formal application.

Thank you for your consideration of this pre-proposal.

For the City,

Ken Grimes, Jr
City Administrator

FY2017-18 RECREATIONAL TRAILS PROGRAM

PRE-APPLICATION FORM

DEADLINE: NOON, FRIDAY, January 6, 2017

Applicant's Name (Organization): City of Orange Beach

Address: 4101 Orange Beach Boulevard

Orange Beach, AL

ZIP: 36561

County: Baldwin

FEI Number: 63-0888669

DUNS Number: 791793961

Project Title (6 words max): Backcountry Trail Interpretive Loop

Project Description (25 words max):

This project is to grade and install compacted crushed limestone to meet ADA compliance along a 0.6 mile connection from the Orange Beach Sportsplex to the Hugh Branyon Backcountry Trail

Park Name, if applicable: Hugh S. Branyon Backcountry Trail Interpretive Loop

Park Address:

Orange Beach

ZIP: 36561

GPS Coordinates of Project
(in degrees):

30.16 N, 87.36 W

Congressional District: 1st

State Senate District: 32nd

State House District: 95th

Applicant Chief Elected Official,
Director, or President:

Ken Grimes, Jr., City Administrator

Phone and Email: 251-981-6979

Grant Administrator or
Other Contact:

Phillip West, Coastal Resources Manager

Phone and Email: 251-981-1063, pwest@cityoforangebeach.com

Project Descriptive Narrative

Provide a brief, yet informative, description of the proposed project; address each evaluation criterion on the following pages (provide additional narrative and documents as may be needed to support your response to each evaluation criterion); and include a cost estimate, a preliminary site plan, plat and/or legal description, and location map.

Project Information

Name of Project: Hugh S. Branyon Backcountry Trail Interpretive Loop

Trail Length in Linear Feet (L.F.): 3,432 L.F. Trail Width: 12 feet

Trail Surface Type: Compacted Crushed Limestone, (3/8" to 0")

Application Type: ☐ Non-motorized for a Single Use ☐ Motorized
☒ Non-motorized for Diverse Use ☐ Educational

Type of Applicant: ☒ City/Town ☐ County
☐ State ☐ Private Organization

Brief Description of the Project:

The Backcountry Trail Interpretive Loop Project will connect the Hugh S. Branyon Backcountry Trail, a National Recreation Trail, to the Orange Beach Sportsplex via a .65-mile loop around a city-owned lake and natural area contiguous to the Trail and Sportsplex. This project will be managed as an ADA-compliant, multi-use path system and will incorporate natural interpretive signage and projects along its length.

Please address each evaluation criterion and insert your answers below each (120 Total Available Points).

- 1. Describe the degree to which the project's scope and feasibility meet the project area's recreational needs. (Key Consideration:** The Interpretive Loop project greatly enhances the recreational options at the Orange Beach Sportsplex, and incorporates environmental interpretive elements currently lacking at the sports facility as well as the Backcountry Trail. The trail is designed to be constructed along an existing (but only occasionally-maintained) firebreak corridor, which will not only minimize clearing, grubbing and grading, but will also allow the newly-constructed trail to function more effectively as a firebreak, thus allowing the interior

wetland areas adjacent to the new trail to be maintained with regular prescribed burning, enhancing wet pine flatwoods and pitcher plant bog habitats. This will allow for more environmental interpretation for folks using both the Sportsplex and the Backcountry Trail. Additionally, the city plans to incorporate more “play places” along this corridor for younger trail users, such as “parkour*” challenges, swinging bridges, and other structures that blend well with the natural environment. Finally, the project will create a connection between the adjacent neighborhood (approximately 170 homes) and the Sportsplex and the Backcountry Trail.

**Parkour is a natural method for training the human body to be able to leap and move from place to place by climbing, jumping and flipping*

2. **Describe the ways in which the project provides for the greatest number of compatible recreational purposes.** The Interpretive Loop project will greatly enhance the ability of Sportsplex users as well as Hugh S. Branyon Backcountry Trail users to experience a more environmentally-themed excursion with unique play place opportunities for younger trail users and families. The trail will be constructed of “crusher fine” limestone aggregate, which is unique to the current Backcountry Trail system as it is entirely a paved asphalt trail. This trail surface will be compacted to ADA-compliant (American with Disabilities Act) standards, thus permitting wheelchair access to natural, wildland areas currently unavailable to such users. The addition of this loop to the Backcountry Trail and its connection to the Orange Beach Sportsplex will also create additional options for events such as fun-runs and other, shorter race events along the Backcountry Trail.
3. **Describe the ways in which the project provides a new, unique, or more effective means for making trail opportunities available to the public. (Key Consideration:** The Interpretive Loop will be unique in that it will be the first attempt at having a more natural surface for a multi-use trail, while maintaining ADA-compliant standards. The proposed surface is designed with sensitivity to the natural surroundings, and therefore will provide the trail user a different experience than the Backcountry Trail system, and will be an ideal venue for environmental interpretation and observation. This addition to Backcountry Trail infrastructure tied to the Orange Beach Sportsplex will be unique to both the local community and the visitors to the Trail and Sportsplex. Finally, the Interpretive Loop will allow direct pedestrian and bicycle access from the adjacent neighborhood to both the Backcountry Trail system and the Orange Beach Sportsplex.
4. **Describe the ways in which the project facilitates the access and use of trails by persons with disabilities, older citizens, economically disadvantaged, and other special populations or groups.** The City of Orange Beach has nearly 40% of its population made up of folks under 18 years of age, or over 65 years of age. The Over 65 age group in Orange Beach is nearly 7% higher than the state percentage rate of population. Additionally, Orange Beach has a very dynamic winter visitor population, with retirees from across the country spending the winter months in Orange Beach and Gulf Shores. The addition of the Interpretive Loop will enhance trail access for both the very young user as well as the older and/or limited

mobility trail user. The environmental education components of this new alignment will create valuable education opportunities for the younger trail user, and provide points of interest for especially visitors unfamiliar with coastal habitats and ecosystems.

5. **Describe the ways in which the project creates opportunities for new partnerships between trail users, private interests, and public agencies within the project area.** The Interpretive Loop Trail will offer expanded opportunities for a variety of user groups for new and unique recreational and educational opportunities. Some of the regular groups using the Backcountry Trail as an event location, with the Sportsplex being the staging and parking area for these events, are the Orange Beach Sports Commission, the Backcountry Trail Foundation, the Alabama Gulf Coast Chamber of Commerce, the Alabama Gulf Coast Convention & Visitor's Bureau, the Alabama Coastal Foundation, the City of Orange Beach, and various other clubs and associations. The uniqueness of the new trail's surface, length and location in regards to the Backcountry Trail and the Orange Beach Sportsplex will make it much more usable than when only the Backcountry Trail was available on which to plan and hold events. The Hugh S. Branyon Backcountry Trail—of which the new Interpretive Loop will be a part—is managed in cooperation with several user groups, such as the Backcountry Trail Foundation, the Backcountry Trail Advisory Committee and the City of Orange Beach staff and Municipal Council.
6. **Describe the ways in which the project uses the grant funds to leverage other public or private investments (in the form of services and materials as well as dollars).** The City of Orange Beach proposes to provide additional match in the form of in-kind services and labor as well as materials (valued at \$10,660) to construct a bridge over a drainage area located along the proposed trail. The city will also provide and install silt fencing and sediment barriers during construction of the trail (~ \$1,500). Additionally, the Backcountry Trail Foundation has purchased the first phase of equipment to be installed for a parkour “play place” along the Loop, valued at \$10,000.
7. **Describe the degree of commitment to continue operation and maintenance of the project. Include an operation and maintenance plan detailing the amount of money needed to operate and maintain the trail after it is completed and identify who will be responsible for the work.** Currently, the City of Orange Beach Coastal Resources Department maintains the Hugh S. Branyon Backcountry Trail, with three full-time employees dedicated to keeping the trail system in excellent condition on a year-round basis. The Interpretive Loop section of the Backcountry Trail system will be maintained by the same crew, and managed by the Coastal Resources senior staff. The Backcountry Trail Staff and Operating Budget for 2016 was \$94,000, which included salaries, fuel, equipment and supplies. The city also funds trail projects and equipment through the Backcountry Trail EcoTour program, where trained staff provide 2.5-hour tours via 8-passenger carts to folks along the trail, highlighting the trail's natural and historical resources. Additionally,

special equipment, supplies and marketing and promotional efforts are provided by the Backcountry Trail Foundation through donations, merchandise sales and campsite rentals, and contribute approximately \$20,000 annually to trail enhancement, development, maintenance and marketing.

8. **The degree to which community involvement is addressed: i.e., (A) Project idea originated with trail users or a community group that has substantial knowledge, and (B) The private sector (including individual citizens, community groups, or local business enterprises) has participated in the development of the proposed idea and has made commitments of labor, money, or materials to support proposed implementation.** The Interpretive Loop concept was borne out of a desire by the Gulf Shores & Orange Beach Sports Commission to develop a 1-mile track through the Backcountry Trail in order to have special events/races of a consistent length for younger runners. After hearing from neighborhood residents wishing to have a connection to the Backcountry Trail, as well as the desire of the Sports Commission to have a one-mile course over the Backcountry Trail, City of Orange Beach staff/trail managers developed the conceptual alignment, and with input from the Backcountry Trail Foundation and the Backcountry Trail Advisory Committee settled on the proposed alignment. The Backcountry Trail Foundation has committed to installing the first phase of a play destination (i.e., the "parkour" challenge course) along the Loop, which is a \$10,000 project for Phase 1.
9. **Describe in detail how the trail will be managed. Include discussion on season length, hours of operation, limitations on use, enforcement provisions, and scheduling.** As part of the Hugh S. Branyon Backcountry Trail, the Interpretive Loop Trail will be covered by the same rules and regulations as the parent Backcountry Trail system. The Trail is open year-round, during daylight hours only, except for registered backcountry campers. The trail system is considered "multi-use" for pedestrians and bicycles, but motorized vehicles are prohibited; horses are prohibited except during certain special events. Trail enforcement is shared by the City of Orange Beach Police Department and the Gulf State Park park ranger staff. The trail hosts an average of seven larger special events annually, not including school field trips, ecotours or high school cross country races.
10. **Identify and describe the service area of the project. Approximately how many people do you propose to serve with this project? Identify other trail resources in the service area by trail type (motorized, non-motorized, multi-use), distance, location in relation to the proposed trail, and ownership.** The Interpretive Loop will be a segment of the greater Hugh S. Branyon Backcountry Trail system, which is a 25-mile non-motorized, multi-use trail system that connects the cities of Gulf Shores and Orange Beach and Gulf State Park. The trail is utilized by an estimated 25,000 visitors per year, with over 200,000 trips made annually. The users are comprised of local residents, short-term and long-term visitors and day-trippers. The Trail's local service area includes a 2,600-mile area, with regular

visitors to the Trail from the greater metro Mobile, Alabama area to Pensacola, Florida, with a total residential population of nearly 750,000. The Backcountry Trail is the only trail of its type in this service area, being a paved, multi-use ADA-accessible along its 25-mile length **though natural and wildland areas**. Additionally, the Trail lies within the State's highest concentration of annual tourists, with over 6 million visitors in 2015. As nature-based tourism is the fastest growing segment of the tourism industry, trail developments geared towards nature access and interpretation promise to be a decisive factor in attracting visitors to our area.

11. Identify the length of time the trail will be maintained and open and available to the public and identify the method to be used to ensure this commitment (deed covenant, deed restriction, etc.). As part of the Backcountry Trail system, it is the intent of the city to ensure the Interpretive Loop Trail will be maintained in perpetuity for use by the public as a recreational trail. A recorded deed restriction will be placed on the trail right of way (30 feet) for this purpose.

12. The Universal Trail Assessment Process (UTAP) and the High Efficiency Trail Assessment Process (HETAP) are methods of obtaining and recording objective data related to outdoor, natural environments. They are tools that land managers, agencies, and individuals can utilize to learn about, monitor, improve, and encourage the safe and enjoyable use of any outdoor path of travel. Points are available to project sponsors committing to the assessment of the trail and installation of Trail Access Information signage. The UTAP and HETAP information provided at trailheads and trail intersections is valuable information the city would like to incorporate throughout the Backcountry Trail system. As part of the Interpretive Loop Trail, the city will incorporate Trail Access Information signage following construction of the trail alignment and prior to grant closeout.

Total Project Cost: \$157,825.13 Funds Requested: \$116,532.00

Important Note: The maximum grant amount by trail type is **\$70,000.00** for non-motorized, single-use trails; **\$200,000.00** for non-motorized, diverse-use trails; **\$500,000.00** for motorized trails, or **\$87,489.00** for education projects.

History and Purpose

The Recreational Trails Program (RTP) is a federal grant program authorized by Congress for the purpose of providing states, local governments, and private sector organizations with funds to acquire lands and develop and/or improve trail and trail-related resources.

Allocation of Funds for the 2017-18 Funding Cycle

The RTP funds are appropriated by Congress to the U. S. Department of Transportation, Federal Highway Administration (FHWA), and FHWA allocates the funds through state agencies as a grants program to subrecipients. Alabama's allocation to subrecipients for fiscal years 2017 and 2018 will be approximately \$3,200,000.00.

Division of Available Funds

The maximum grant amount by trail type is **\$70,000.00** for non-motorized, single-use trails; **\$200,000.00** for non-motorized, diverse-use trails; **\$500,000.00** for motorized trails, or **\$87,489.00** for education.

Thirty percent of Alabama's RTP funds must be used for motorized trail uses, 30 percent for non-motorized trail uses, and 40 percent for diverse trail uses. Diverse motorized projects (such as ATV and motorcycle) or diverse non-motorized projects (such as pedestrian and equestrian) may satisfy two of these categories at the same time. The State encourages applicants to consider projects that benefit both motorized and non-motorized users, such as common trailhead facilities.

Eligible Applicants

Eligible applicants include incorporated municipalities, counties, legally constituted recreation authorities and commissions, and private sector organizations that can demonstrate an ability to adequately manage Federal grant funds. **No application will be reviewed from an applicant not currently registered in Sam.gov under its own name and Data Universal Numbering System (DUNS) number.**

Pre-applications

The Alabama State Comprehensive Outdoor Recreation Plan 2013-2018 is the guiding document for funding projects from the RTP. This document is available on the Alabama Department of Economic and Community Affairs (ADECA) website at www.adeca.alabama.gov. Statewide issues were gathered and new criterion were developed to evaluate projects. These criterion make up the pre-application. **City, county, or private sector applicants may submit only one application for its highest priority outdoor recreation project. State agencies may submit multiple applications.** Funds will be allocated to the highest-ranking projects based on scores derived from the evaluation criterion.

Applicants are required to adhere to the grant ceilings listed.

Formal Applications

Applicants receiving the highest-ranking scores on their pre-applications will be invited to submit second-level applications. Recreation and Conservation Programs staff will be available to answer any questions. **Note: An environmental review and/or assessment will be required for all projects selected to proceed in the second-level-application process.**

Target Timeline for the 2017-18 Funding Cycle

October 2016

Funding cycle for 2017-18 RTP grants and Application Workshop is announced to all municipalities, counties, regional commissions, and grant administrators via e-mail and/or direct mail and website announcement.

Noon, Friday, January 6, 2017

Pre-applications (1 original and 1 digital copy (we will not accept emailed copies)) are due to ADECA.

Each pre-application must include:

- A cover letter on official letterhead signed by the chief elected official/executive director/president
- A signed Pre-application Form to include a response to each of the evaluation criterion
- A resolution adopted by the legal entity of the applicant authorizing the application and committing all matching funds required to complete the proposed project
- A narrative description of the proposed project
- Estimate of cost
- Preliminary site plan
- Plat and/or legal description of the property proposed for purchase and/or development
- Location map
- Verification of sam.gov registration

February 2017

Recreation and Conservation Programs staff and the Alabama Recreational Trails Advisory Board review pre-applications for priority rankings based on evaluation criterion, make recommendations for funding to the ADECA Director, complete site inspections, invite the respective local applicants receiving the highest-ranking scores to submit second-level applications, and forward copies of the selected pre-applications to the FHWA.

March 2017

Second-level applications are due to ADECA. Recreation and Conservation

Programs staff will coordinate and correspond as appropriate with each successful applicant to determine if additional documents are needed to complete the formal application process.

TBA

Official notification of award sent to successful applicants.

Minimum Requirements

These are requirements that an applicant must meet in order to be considered for a RTP grant. There are no points attached to these requirements. Only one of two situations may occur: (1) Yes, the applicant meets all minimum requirements and is therefore eligible for consideration of funding based on how the proposed project scores under the evaluation criterion; or (2) No, the applicant does not meet the minimum requirements and is therefore ineligible for funding under the RTP.

Any questions concerning the minimum requirements should be addressed to the Recreation and Conservation Programs staff.

Equal Opportunity:

Applicants must comply with Title VI of the Civil Rights Act of 1964, as amended; Section 504 of the Rehabilitation Act of 1973, as amended; the Age Discrimination Act of 1975; the Americans With Disabilities Act of 1990, as amended; and all other State and Federal laws and regulations on nondiscrimination. This means that no person shall be discriminated against on the basis of race, color, sex, national origin, age or disability for recreation programs and facilities sponsored by applicants.

Legally Constituted Entity

The applicant must be a legally constituted entity. This includes a municipality, county or a legally constituted recreation board, commission or authority with legislative sanction, or private sector corporation. All applicants must be currently registered in Sam.gov with their own DUNS number.

State and Federal Laws / Regulations

Applicants must comply with existing laws and regulations for receiving and expending State and Federal grant money including, but not limited to, public notices, bidding and purchasing requirements, Uniform Relocation Act, Americans with Disabilities Act and Architectural Barriers Act Accessibility Guidelines (ADAAG), Energy Standards, laws and regulations regarding Historic Preservation and archaeological concerns, National Environmental Policies Act, and related environmental rules and regulations. Applicants must not have been debarred, suspended, or otherwise ruled ineligible to participate in Federal programs by any Federal department or agency.

Important note: An environmental review and/or assessment will be required for all projects selected to proceed in the formal application process.

Operation and Maintenance

Applicants must have a satisfactory record of accomplishment for operation and maintenance of public recreation areas and facilities or must have a formal written agreement with an entity with a satisfactory record of accomplishment for operation and maintenance of public recreation areas and facilities in order to apply.

Grants Administration

Applicants must have a satisfactory record of administering Federal grant funds or must have a formal written agreement with an entity with a satisfactory record of administering Federal grant funds. Grant administration professionals may be acceptable substitutes for some institutional capacity upon approval from ADECA.

Twenty Percent Match

Applicants must document the availability of the required minimum twenty percent (20%) match for each application. This requires that each applicant **submit a resolution** passed by its governing authority that, if a grant were awarded, the required match would be forthcoming. Applicants should be advised that this is a reimbursement program. Funds must be available to expend. Once expenditures are made, reimbursements can be requested. The reimbursement process can take up to 90 days.

User Fees

Applicants must agree that any and all user fees, either resulting from this application or as part of the applicant's system of public parks and recreation areas, cannot be so large as to be exclusionary.

Prospective applicants are not eligible to apply if:

- Entity has an open Land and Water Conservation Fund (LWCF) or RTP grant as of January 6, 2017.
- Entity has unresolved compliance issues from a previous LWCF or RTP grant.
- Entity did not respond in writing to a LWCF or RTP inspection report that contained deficiencies.
- Entity has not completed and received approval of a Corrective Action Plan for previous compliance issues.

Submission Instructions

Please submit an original and a digital copy (an emailed copy will not be accepted) of your application. Be sure each application includes:

- Cover letter on official letterhead signed by the chief elected official/executive director/president

- A signed Pre-application Form to include a response to each of the evaluation criterion
- A resolution adopted by the legal entity of the applicant authorizing the application and committing all matching funds required to complete the proposed project
- A narrative description of the proposed project
- Estimate of cost
- Preliminary site plan
- Plat and/or legal description of the property proposed for purchase and/or development
- Location map
- Verification of sam.gov registration

Please submit your application with a single binder clip. Please do not staple, spiral bind, or book bind your application.

Please submit applications to:

BY MAIL:

Alabama Department of Economic and Community Affairs (ADECA)
Community and Economic Development Programs Division

RESOLUTION

RESOLUTION AUTHORIZING SUBMITTAL OF THE FY2017 RECREATION TRAILS PROGRAM GRANT APPLICATION

FINDINGS:

1. The City Council for the City of Orange Beach, Alabama, has reviewed the proposed grant application (attached Exhibit "A") to the Alabama Department of Economic and Community Affairs for grant assistance to build the Interpretive Loop Project that will connect the Hugh S. Branyon Backcountry Trail to the Orange Beach Sportsplex via a .65-mile loop around a city-owned lake and natural area contiguous to the Trail and Sportsplex.
2. Programs are limited to funding a maximum of eighty percent (80%) of the total proposed project cost estimated at \$116,532 which will be used to build the Interpretive Loop Project.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF ORANGE BEACH, ALABAMA, AS FOLLOWS:

1. The City of Orange Beach will hold in reserve \$29,133.03, twenty percent (20%) cash match plus \$12,160 in-kind match of the proposed project cost for the purpose of matching the Recreational Trails Program.
2. In event the grant is awarded, the City of Orange Beach understands that it will sign assurances to comply with all applicable Federal and State laws, rules and regulation.

This Resolution shall become effective upon its adoption.

ADOPTED THIS 3rd DAY OF JANUARY, 2017.

Renee Eberly
City Clerk

 SAM.gov will be down for scheduled maintenance Saturday, 01/07/2017, from 8:00 AM to 4:00 PM (EST).

SAM Status Tracker

Check Entity Registration Status

Page Description

You can quickly check an entity's registration status in SAM by entering a DUNS Number or CAGE Code. The SAM Status Tracker will show you the current status of the entity associated with that DUNS Number or CAGE Code, as well as tell you what steps are left to complete based on why they are registering.

The SAM Status Tracker uses seven circles to represent steps in the registration process: Core Data, Assertions, Reps & Certs, POCs, Submit, Processing, and Active. Visual indicators in the circles, text underneath the circles, a status message in bold above the circles and user messaging combine to give the registration status.

You will only see the registration status for publicly-searchable registration records in the SAM Status Tracker. Federal government users must log into SAM and search for non-public records.
